

*Quality is our primary concern  
for your satisfaction.*

**Specialty Screw utilizes  
Optical automated sorting  
machines to focus on zero  
discrepancies to the customer.**

- Assurance of contaminant free product
- Precise measurements for high volume parts prior to introduction into production

**Other Inspection Methods  
include:**

- SPC
- Hardness Testing
- Optical Comparator
- Salt Spray Test Cabinet
- Automotive PPAP

**Certifications**

- ISO 9001:2015
- IATF 16949:2016

## Cold Forming

*Specialty Screw Corporation* manufactures standard and metric: special fasteners, special screws, and special bolts to customer requirements using cold formed technology.

## Benefits

Cold forming vs the standard CNC machining allows for:

- Elimination of material waste.
- Provides products with greater strength, reliability and durability.

## Size Range

Inch:

Diameter: #6 (.138) to 3/4"

Length: 3/8" to 5-1/2"

Metric:

Diameter: 3.5mm to 19mm

Length: 10mm to 140mm

*Specialty Screw Corporation* also offers complete in-house secondary capabilities including:

Trimming  
Shaving  
Drilling/Tapping  
Roll Threading  
Roll Forming  
Slotting

Pointing  
Milling  
Flattening  
Inspection  
Sorting

## Industries Served

- Automotive
- Firearms
- Hand Tools
- Building Hardware Parts
- Electrical Storage
- Recreational Equipment
- Infrastructure
- Furniture

## Product Types

- Ball Studs
- Shoulder & Collar Bolts
- Isolator & Valve Cover Bolts
- Double End Collar Studs
- Thread Forming Screws
- Precision Rivets
- Cold Formed Parts & Products
- Six-lobe Recess Drives
- Special Pins
- Synergistic Assemblies

**MAThread**

*Specialty Screw Corporation* has a license to manufacture the MAThread® and MATpoint®. MAThread® is a self aligning feature that is incorporated into the lead-in point and starting threads of the fastener.
